Ideation Diagram

Date	30 September 2026
Team ID	6ab4e2eba238dc999eb5fb00
Project Name	**Script-Controlled ACL – Restrict Record Access Based on Field Value**
Maximum Marks	3 Marks

Ideation Diagram – Description

The **Ideation Diagram** presents the ideas generated by the team for improving record security in the ServiceNow application. The brainstorming focused on controlling access to the **Institution Details** table using field-based conditions, creating separate roles for Read, Create, Write, and Delete operations, and testing access using ECE, EEE, and CSC branch records. After evaluating the proposed ideas, the team selected the **Script-Controlled ACL based on the Branch field** as the main solution because it directly addresses the requirement to restrict unauthorized record access.
