ER Diagram

Date	30 September 2026
Team ID	6ab4e2eba238dc999eb5fb00
Project Name	**Script-Controlled ACL – Restrict Record Access Based on Field Value**
Maximum Marks	3 Marks

The **Entity–Relationship (ER) Diagram** represents the structure of the **Institution Details** data used in the ServiceNow project. The main entity contains attributes such as **Student ID, Student Name, Faculty Name, Branch, Email, Phone Number, and Description**. The **Branch** attribute stores values such as ECE, EEE, and CSC and is the key field used by the Script-Controlled ACL to determine record access. User and role information is associated with the access-control mechanism, where roles such as **BB1, BB2, BB3, and BB4** determine the permitted Read, Create, Write, and Delete operations.
