TEAM ROLES

Date	30 September 2026
Team ID	6ab4e2eba238dc999eb5fb00
Project Name	**Script-Controlled ACL – Restrict Record Access Based on Field Value**
Maximum Marks	3 Marks

TEAM ROLES AND RESPONSIBILITIES

ServiceNow Project – Script-Controlled ACL

The project team consists of five members. One member is designated as the Project Leader, while the remaining four members serve as Team Members. The Project Leader is responsible for carrying out the main ServiceNow project implementation, coordinating the team, completing the final submission, and updating the project video link in Google Drive. The four Team Members support the project through documentation, report preparation, testing, screenshots, and other assigned activities.

1. Team Structure

Member	Role	Primary Responsibility
T.Aswini	Project Leader	Main project implementation, coordination, final submission and video-link update
V.Yogesh	Team Member	Project documentation and preparation of supporting documents
AA Aswin	Team Member	Project report preparation, formatting and compilation
SV Vijayasree	Team Member	Testing, validation and collection of project evidence/screenshots
R.Rabish	Team Member	Support activities, review, presentation/demo preparation and submission assistance

2. Detailed Responsibilities

Project Leader – Member 1

- Create and configure the ServiceNow project according to the assigned project requirements.
- Create the required user and roles and configure the Institution Details table.
- Implement and verify the Read, Create, Write and Delete ACLs.
- Coordinate the activities of all four Team Members.
- Review the completed documentation and project evidence.
- Complete the final project submission using the Project Leader's credentials as required.
- Record or maintain the final project demonstration video.
- Upload/maintain the final video in Google Drive and update the required video/demo link.
- Perform the final verification before submission.

Team Member 2 – Documentation Support

- Prepare project documentation based on the work completed by the Project Leader.
- Organize project objectives, problem statement, requirements and methodology.
- Maintain supporting notes and project-related records.
- Provide the completed documentation to the Project Leader for final review.

TEAM ROLES

Team Member 3 – Report Support

- Prepare and format the project report.
- Assist with sections such as Ideation, Architecture, Use Case, DFD, ER Diagram and ACL Matrix.
- Insert appropriate screenshots, captions and explanations.
- Check formatting, consistency and completeness of the report.

Team Member 4 – Testing and Evidence Support

- Support testing of the configured ServiceNow project.
- Verify the ACL behavior for Read, Create, Write and Delete operations.
- Capture important screenshots and organize them with suitable titles.
- Record test observations and expected versus actual results.
- Report any issue found during testing to the Project Leader.

Team Member 5 – Review and Presentation Support

- Review the project documentation and report for completeness.
- Assist with presentation/demo preparation.
- Check that screenshots, diagrams and supporting files are properly organized.
- Assist the Project Leader with final verification and submission preparation.
- Support any additional task assigned by the Project Leader.

3. Final Submission Responsibility

The Project Leader is the primary person responsible for the final project submission. The Team Members provide the required supporting documents, report, screenshots, testing evidence and other materials to the Project Leader. After reviewing the complete project, the Project Leader performs the final submission and updates the required project video or demonstration link in Google Drive.

4. Team Workflow

1. Project Leader receives/opens the project and establishes the project structure.
2. Project Leader completes the main ServiceNow implementation.
3. Team Members support documentation, report preparation, testing, screenshots and presentation activities.
4. Team Members submit their completed supporting work to the Project Leader.
5. Project Leader reviews and integrates all supporting materials.
6. Project Leader completes final testing and verifies the project.
7. Project Leader prepares the final submission and updates the Google Drive video/demo link.
8. Project Leader completes the final project submission.

5. Responsibility Summary

In summary, the Project Leader has overall responsibility for the project implementation, coordination, final verification, final submission and Google Drive video-link update. The four Team Members provide supporting contributions in documentation, report preparation, testing, screenshot collection, review and presentation activities. This division of responsibilities ensures that all five members contribute to the successful completion of the project while maintaining a clear final-submission responsibility.
