Demo Project

Date	30September 2026
TeamID	6ab4e2eba238dc999eb5fb00
ProjectName	**Script-Controlled ACL – Restrict Record Access Based on Field Value**
Maximum Marks	3 Marks

`Demo_Project` as the folder/repository name for your ServiceNow project, I recommend this structure:

```

Project name

Script-Controlled ACL – Restrict Record Access Based on Field Value

GitHub repository name

`Demo_Project`

Main purpose

The project demonstrates how **ServiceNow Access Control Lists (ACLs)** can restrict access to records according to the **Branch** field, allowing the configured user to access the required **EEE** records while restricting other branch records.

If you want, I can also create the **complete `Demo_Project` folder with all 8 phases and the existing project files arranged correctly**, ready for uploading to GitHub.
